Company Description

RiskVal was established in 2001 by the founder and CEO, Jordan Hu. He was determined to bring together talents from Wall Street and academia to create a front office platform that was not only powerful but flexible to evolve with the market in real-time. This has become the core motto for RiskVal in our journey to become the #1 front office solution for the fixed income markets.

RiskVal brings together a team of highly experienced and disciplined team of quants and software engineers, in order to provide an integrated approach for pricing, portfolio management, and risk management. Their expertise and efforts, combined with direct feedback from our clients at top-tier financial institutions, leads to continuous enhancement of the system. This discipline ensures RVSuite stands head and shoulders above competitors as the leading trading analytics system on Wall Street.
